

PAPER VACUUM RELEASE

Removes product & paper from the trays

PAPER VACCUM RELEASE:

Overhead pneumatic system removes the product and the paper from the trays.

Separates baking paper from underneath product and discards them discreetly underneath the production line.

Works with in-line vacuum / axial system, which allows for a smaller footprint, works with all tray sizes and makes space profitable

Overhead air knife blows down onto paper to enhance operation and a rotating perforated vacuum roller guarantees full contact with paper and facilitates its removal.

Stainless Steel and non-corrosive construction, bakery proven sanitary design.

Works at high speed, reaching 28 trays per minute
